CHAPTER

1

INTRODUCTION TO *RELEASE 182 NOTES*

This edition of *Release 182 Notes* describes the Release 182 Quadro Professional Drivers for Microsoft® Windows® Vista. NVIDIA provides these notes to describe performance improvements and bug fixes in each documented version of the driver.

Structure of the Document

This document is organized in the following sections:

- “[Release 182 Driver Changes](#)” on page 3 gives a summary of changes, and fixed and open issues in this version.
- “[The Release 182 Driver](#)” on page 19 describes the NVIDIA products and languages supported by this driver, the system requirements, and how to install the driver.
- “[Mode Support for Windows](#)” on page 25 lists the default resolutions supported by the driver.

Changes in this Edition

This edition of the *Release 182 Notes* for Windows Vista includes information about NVIDIA graphics driver version 182.46, and lists changes made to the driver since version 178.46. These changes are discussed beginning with the chapter “[Release 182 Driver Changes](#)” on page 3.

CHAPTER

2

RELEASE 182 DRIVER CHANGES

This chapter describes open issues for version 182.46, and resolved issues and driver enhancements for versions of the Release 182 driver up to version 182.46. The chapter contains these sections:

- “Version 182.46 Highlights” on page 4
- “Changes in Version 182.46” on page 7
- “Changes in Version 182.08” on page 8
- “Changes in Version 181.20” on page 9
- “Open Issues in Version 182.46” on page 11
- “Not NVIDIA Issues” on page 13
- “Known Product Limitations” on page 17

Version 182.46 Highlights

This section provides highlights of version 182.46 of the NVIDIA Release 182 Driver for Windows Vista.

- [What's New in Release 181/182](#)
- [What's New in Version 182.46](#)
- [Limitations in This Release](#)
- [Special Instructional Notes for this Release](#)

What's New in Release 181/182

- Added support for the following NVIDIA products:
 - NVIDIA Quadro FX 380
 - NVIDIA Quadro FX 580
 - NVIDIA Quadro FX 1800
 - NVIDIA Quadro FX 3800
 - NVIDIA Quadro NVS 420
 - NVIDIA Quadro NVS 295
- As of version 178.46, the NVIDIA nView Desktop Manager utility is included with the driver installation, and is accessible from the Windows Control Panel.

What's New in Version 182.46

- Added support for the following NVIDIA products:
 - NVIDIA Quadro FX 380
 - NVIDIA Quadro FX 580
 - NVIDIA Quadro FX 1800
 - NVIDIA Quadro FX 3800
 - NVIDIA Quadro NVS 295
- See [“Changes in Version 182.46”](#) on page 7 for a list of resolved issues under Windows Vista.

Limitations in This Release

The following are features that are not currently supported or have limited support in this driver release:

- **NVIDIA SLI Antialiasing**

This driver does not support NVIDIA SLI antialiasing.

- **SDI**

This driver does not support the Serial Display Interface (a standard for driving high color depth displays).

- **Genlock/Frame Lock**

This driver does not support the ability to synchronize multiple display outputs with an external signal.

Features Not Yet Available in the NVIDIA Control Panel

Support for the following control panel features is under development and not yet available under Windows Vista:

- **Display Category**

The Graph tab on the Adjust Desktop Color Settings page is not available.

- **Workstation Category**

The Workstation category page is not available with this driver version.

Special Instructional Notes for this Release

This section clarifies instructions for successfully accomplishing the following tasks:

Turning Off V-Sync to Boost Performance

To get the best benchmark and application performance measurements, turn V-Sync off as follows:

- 1 Open the NVIDIA Control Panel and make sure that *Advanced Settings* is selected from the control panel tool bar.
- 2 From the *Select a Task* pane, under 3D Settings, click **Manage 3D Settings**, then click the Global Settings tab.
- 3 From the Global presets pulldown menu, select **Base profile**.
- 4 From the Settings listbox, select **Vertical sync** and change its value to **Force off**, then click **Apply**.
- 5 From the Global presets pulldown menu, select **3D App - Default Global Settings** (the driver's default profile) or use the application profile that matches the application you are testing, then click **Apply**.

Be sure to close the NVIDIA Control Panel completely —leaving it open will affect benchmark and application performance.

NVIDIA Application Configuration Engine (ACE)

This driver includes the NVIDIA Application Configuration Engine (ACE), which automatically detects the workstation application and configures the appropriate profile settings in the NVIDIA Control Panel.

See the *NVIDIA Quadro Professional Drivers: NVIDIA Control Panel Quick Start Guide* for more information about this feature.

Changes in Version 182.46

The following sections list the changes made and issues resolved since driver version 182.08.

- “Fixed Issues–Windows Vista 32-bit” on page 7
- “Fixed Issues–Windows Vista 64-bit” on page 7

Fixed Issues–Windows Vista 32-bit

Single-GPU Fixed Issues

- Workstation application profile needed for Presagis Vega Prime.
- Quadro CX: Acrobat–the application freezes, crashes, or a blue-screen crash occurs when panning while a 3D animation plays in a 3D window.
- Quadro FX 4600: Siemens TCVis 2005 /2007–displayed images are black.

Fixed Issues–Windows Vista 64-bit

Single-GPU Fixed Issues

- Workstation application profile needed for Presagis Vega Prime.
- thinkdesign–the application crashes.
- Quadro FX 4800: With desktop color-depth set to 16-bit, video playback of DVD, AVI, or MPEG files using Media Player lags.

Changes in Version 182.08

The following sections list the changes made and issues resolved since driver version 181.20.

- “Fixed Issues–Windows Vista 32-bit” on page 8
- “Fixed Issues–Windows Vista 64-bit” on page 8

Fixed Issues–Windows Vista 32-bit

Single-GPU Fixed Issues

- Added “Autodesk Mudbox” and “Autodesk Mudbox - compatible” to the list of applications in the NVIDIA Control Panel.
- Added several Altair executables to the list of applications in the NVIDIA Control Panel.
- Changed the HiCAD application profile settings to VSync OFF and UBB OFF.
- Quadro FX 4800: With desktop color-depth set to 16-bit, video playback of DVD, AVI, or MPEG files using Media Player lags.

Fixed Issues–Windows Vista 64-bit

Single-GPU Fixed Issues

- Added “Autodesk Mudbox” and “Autodesk Mudbox - compatible” to the list of applications in the NVIDIA Control Panel.
- Added several Altair executables to the list of applications in the NVIDIA Control Panel.
- Changed the HiCAD application profile settings to VSync OFF and UBB OFF.
- Quadro FX 4800: Photoshop CS4–OpenGL settings are greyed out and cannot be set for the application.

Changes in Version 181.20

The following sections list the changes made and issues resolved since driver version 178.46.

- “Fixed Issues–Windows Vista 32-bit” on page 9
- “Fixed Issues—Windows Vista 64-bit” on page 9

Fixed Issues–Windows Vista 32-bit

Single-GPU Fixed Issues

- Allplan BIM 2008 is significantly slower compared to previous version (Allplan (2006).
- Maya 2009: driver versions and configurations need to be defined for the application in order to properly run in stereo.
- KOMPAS-3D V9 SP1 –the CAD software runs faster on a GeForce card when compared to a Quadro card.
- MediaPlayer video becomes choppy when multiple 3D demos are run.
- Quadro FX 4800: Poser/Poser Pro exits with an access violation in nvoglv32.dll.
- Quadro FX 4600: The SLI option is missing from the NVIDIA Control Panel.
- Quadro FX 1700: Blue-screen crash occurs when running power management sleep/wake tests.
- Quadro NVS 290: Blue-screen crash occurs when running the Vista-enabled RGS extensions with Vista Aero-glass enabled and other 3-D applications, such as Google Earth, running.
- Quadro FX 1500: The GPU fan stays on at full speed after resume from Hibernate.

Multi-GPU Issues

- Dual NVIDIA Quadro FX 4500: `wglEnumGpusNV()` enumerates only one GPU.

Fixed Issues—Windows Vista 64-bit

Single-GPU Issues

- KOMPAS-3D V9 SP1 –the CAD software runs faster on a GeForce card when compared to a Quadro card.
- MediaPlayer video becomes choppy when multiple 3D demos are run.

- Quadro FX 5800: The driver crashes when entering Standby or Hibernate modes.
- Quadro FX 4800: Poser/Poser Pro exits with an access violation in nvoglv32.dll.
- Quadro FX 4800: GLView –the VSync function runs slowly.
- Quadro FX 3700/3500: Maya 2009–there is no 3D stereo profile for the application.
- Quadro FX 3700: Stereo clone mode does not work.
- Quadro FX 1500: The GPU fan stays on at full speed after resume from Hibernate.

Multi-GPU Issues

- Dual NVIDIA Quadro FX 4500: `wglEnumGpusNV()` enumerates only one GPU.

Open Issues in Version 182.46

As with every released driver, version 182.46 of the Release 182 driver has open issues and enhancement requests associated with it. This section includes lists of issues that are either not fixed or not implemented in this version. Some problems listed may not have been thoroughly investigated and, in fact, may not be NVIDIA issues. Others may have workaround solutions.

- [“Windows Vista 32-bit Issues”](#) on page 11
- [“Windows Vista 64-bit Issues”](#) on page 12

Windows Vista 32-bit Issues

Single-GPU Issues

- Workstation application profile needed for AVID Deko.
- AutoCAD—the application crashes with a “Display driver stopped responding” error when full shadows are turned on.
- Maya 2010: glClampColorARB goes into software rendering mode.
- In Dualview mode with each display running at different refresh rates, there is tearing in OpenGL windows, indicating that the driver is not sync’ing to V-blank.
- Quadro FX 3700: SOCET GXP—on monochromatic images, a right-click pop-up menu remains flashing over the image even after the pop-up window is invoked.
- Quadro FX 3700: SOCET GXP—menus that overlap the stereo imagery cause the stereo panel to change to mono until the menu is gone.
- Quadro FX 1500/3700: Vertical sync does not work on the secondary display.
- Quadro FX 1700: 3ds Max 2009—the performance drops when applying a scene effect.
- Quadro FX 1400: Inventor - the application crashes.

Windows Vista 64-bit Issues

Single-GPU Issues

- Workstation application profile needed for AVID Deko.
- Quadro FX 4500/3500: Maya-cpvTransparencyTest no longer renders properly with Cg2.0+.
- Quadro FX 1400: Inventor - the application crashes.

Not NVIDIA Issues

This section lists issues that are not due to the NVIDIA driver as well as features that are not meant to be supported by the NVIDIA driver for Windows Vista.

- “Windows Vista Limitations” on page 13
- “Unsupported Features” on page 13
- “OpenGL Application Issues” on page 15
- “Application Issues” on page 16

Windows Vista Limitations

These are behaviors that may be different from Windows XP and are related directly to the Windows Vista operating system.

- Gamma ramps are inconsistent between single and two-headed systems.
- World of Warcraft – there is a 60% drop in performance when running the game in windowed mode with SLI or multi-GPU mode enabled.

This is due to a limitation of the Windows Vista operating system and affects all multi-GPU systems. NVIDIA is investigating a workaround for this performance problem.

Unsupported Features

The following are features and functionality that were available in driver releases supporting Windows XP, but are not available in driver releases for Windows Vista:

- **High resolution scaling desktop (HRSD)**
- **MultiView Display Mode** (for NVIDIA Quadro NVS graphics cards)
- **NVKeystone**
- **Unified back buffer (UBB) controls**
- **OpenGL Video Overlays**

This is an operating system limitation.

Vista window manager features will provide new ways of accomplishing overlays, but will require application porting.

- **Overclocking**

GPU overclocking is no longer supported in the default GPU driver control panel. This feature is available in the NVIDIA nTune 5.05 software, which you can download from NVIDIA.com.

- **GPU Temperature Monitoring**

Temperature monitoring is no longer supported in the default GPU driver control panel. This feature is available in the NVIDIA nTune 5.05 software, which you can download from NVIDIA.com.

AGP Settings Adjustment

- **Full-screen Video Mirror**
- **Video Zoom**
- **Pan & Scan** - the process of panning across the desktop in order to display a desktop on a monitor with lower resolution
- **Per-display Desktop Color Setting Adjustments**

For Clone mode, the desktop color setting adjustments through the NVIDIA Control Panel can only be made across all displays in a system, and not on a per-display basis.

- **Per-display Video Color Setting Adjustments**

For Dualview mode, the video color setting adjustments through the NVIDIA Control Panel can only be made across all displays in a system, and not on a per-display basis.

- **nView Horizontal and Vertical Span Modes**

Due to architectural changes in the new Windows Vista Window Display Driver Model (WDDM), span mode cannot be supported in NVIDIA graphics drivers. NVIDIA recommends using the built-in Windows Vista multi-display modes.

- **Edge Blending**
- **Run display optimization wizard**
- **Run multiple display wizard**
- **Run television setup wizard**
- **Display/Connection Wizard** (such as was provided with Windows Media Center Edition)
- **DVD/MPEG Extensions** (such as was provided with Windows Media Center Edition)
- **Audio Extensions** (such as was provided with Windows Media Center Edition)

OpenGL Application Issues

The following are known compatibility issues for OpenGL applications developed under Windows XP:

- Mixed GDI and OpenGL rendering does not work.

A number of applications use GDI to render UI components and object highlighting. This is not supported in the Windows Vista driver model.

NVIDIA recommends converting GDI rendering to OpenGL.

The following are some applications that are known to have this issue:

- Maya 7.01
- OneSpace Designer Modeling
- Applications, Tools, and Benchmarks not supported under Windows Vista
 - GLperf
 - 3ds max 8 (later releases may be supported)
 - CATIA V5R15 (V5R16 is supported)
 - PTC's CDRS 2001
- Front buffered rendering may be slow, especially when DWM is enabled.

Flushing the rendering queue while rendering to the front buffer may cause the window manager to recomposite. Applications should therefore minimize the frequency with which they flush the rendering queue.

Application Issues

- **General Antialiasing Problem with Top Games**

We have found that some games running under Windows Vista enable 16x coverage sampling antialiasing (CSAA) when 4xAA is selected in the game menu, resulting in deflated performance on the latest NVIDIA Quadro FX cards.

The problem occurs with NVIDIA Vista drivers 100.54 and later.

The same effect will occur in future "Release 100" Windows XP drivers.

Affected applications found to date include:

- Battlefield 2
- Battlefield 2142
- Sin Episodes
- Half-Life 2
- Half-Life 2 Lost Coast

To set standard 4xAA in these applications, please set 4xAA in the game, and also enable "Enhance the application" antialiasing mode with a 4x antialiasing setting in the NVIDIA graphics driver control panel.

We are working with developers to implement better in-game CSAA support. You can see CSAA menu selections in Half-Life 2: Episode One and Supreme Commander.

- ArchiCAD12–OpenGL speed is half as fast on Windows Vista than on Windows XP.
- Quadro FX 3700/4600/5600: MediaComposer–polygons are drawn in the wrong color after disabling shaders.
- Quadro FX 1400: AutoDesk Inventor 2009 SP1–the application crashes.

Known Product Limitations

This section describes problems that will not be fixed. Usually, the source of the problem is beyond the control of NVIDIA. Following is the list of problems and where they are discussed in this document:

- “Aero Must be Enabled for Windowed SLI AFR Mode Under Vista” on page 17t
- “SLI Connector Requirement on NVIDIA Quadro SLI Cards” on page 17
- “Image Sharpening Control not Available with Quadro FX 4600 and later GPUs” on page 17
- “Driver Reports 256 MB Memory on NVIDIA Quadro FX 330 Cards” on page 18
- “Applying Workstation Application Profiles” on page 18
- “Gigabyte GA-6BX Motherboard” on page 18

Aero Must be Enabled for Windowed SLI AFR Mode Under Vista

Windows Vista Aero-glass must be enabled in order to achieve SLI acceleration using windowed AFR mode.

SLI Connector Requirement on NVIDIA Quadro SLI Cards

The SLI connector that links two SLI cards is needed for proper SLI operation. However, the connector can be removed if you do not intend to enable SLI mode. If you remove the connector, then you must make sure that SLI mode is disabled from the NVIDIA control panel. Enabling SLI mode without the SLI connector installed will result in video corruption.

Image Sharpening Control not Available with Quadro FX 4600 and later GPUs

With Quadro FX 4600 and later graphics cards, the **Image sharpening** slider on the NVIDIA Control Panel-> Display->Adjust Desktop Color Settings page is grayed out.

This control is intentionally disabled because image sharpening is not supported on Quadro FX 4600 and later GPUs.

Driver Reports 256 MB Memory on NVIDIA Quadro FX 330 Cards

- **Problem**

When a 64 MB NVIDIA Quadro FX 330 card is installed, the driver reports that the card needs 256 MB, causing 256 MB of address space to be consumed.

- **Explanation**

This is not a bug but a product limitation.

The NVIDIA Quadro FX 330 GPU has some limitations that prevent the card from addressing less than 256 MB of system memory.

Applying Workstation Application Profiles

- **Background**

The workstation application profiles are software settings used by the NVIDIA Display Drivers to provide optimum performance when using a selected application. The profile also works around known application issues and bugs.

If there is an available setting for an application, it should be used, otherwise incorrect behavior or reduced performance is likely to occur.

- **Issues**

Configuration changes require that you restart the application.

Once an application is running, it does not receive notification of configuration changes. Therefore, if you change the configuration while the application is running, you must exit and restart the application for the configuration changes to take effect.

Gigabyte GA-6BX Motherboard

This motherboard uses a Linfinity regulator on the 3.3-V rail that is rated to only 5 A—less than the AGP specification, which requires 6 A. When diagnostics or applications are running, the temperature of the regulator rises, causing the voltage to the NVIDIA chip to drop as low as 2.2 V. Under these circumstances, the regulator cannot supply the current on the 3.3-V rail that the NVIDIA chip requires.

This problem does not occur when the graphics board has a switching regulator or when an external power supply is connected to the 3.3-V rail.

CHAPTER

3

THE RELEASE 182 DRIVER

This chapter covers the following main topics:

- “Hardware and Software Support” on page 19
- “Driver Installation” on page 23

Hardware and Software Support

Supported Operating Systems

The Release 182 driver, version 182.46, has been tested with Microsoft Windows® Vista RTM OS builds version 6000 or higher, and supports both 32-bit and 64-bit versions of Windows Vista Editions:

- Windows Vista Home Basic
- Windows Vista Home Premium
- Windows Vista Business
- Windows Vista Enterprise Edition
- Windows Vista Ultimate

Supported NVIDIA Products

Table 3.1 lists the NVIDIA products supported by the Release 182 driver.

Table 3.1 Supported NVIDIA Workstation Products

Product	Windows Vista 32-bit	Windows Vista 64-bit
NVIDIA Quadro FX 5800	X	X
NVIDIA Quadro FX 5600	X	X
NVIDIA Quadro FX 5500	X	X

Supported Languages

The Release 182 Quadro Professional Drivers supports the following languages in the main driver Control Panel:

English (USA)	German	Portuguese (Euro/Iberian)
English (UK)	Greek	Russian
Arabic	Hebrew	Slovak
Chinese (Simplified)	Hungarian	Slovenian
Chinese (Traditional)	Italian	Spanish
Czech	Japanese	Spanish (Latin America)
Danish	Korean	Swedish
Dutch	Norwegian	Thai
Finnish	Polish	Turkish
French	Portuguese (Brazil)	

Driver Installation

Minimum Hard Disk Space

The hard disk space requirement for 32-bit is minimum 73.1 MB for English-only, and 102 MB for International.

The hard disk space requirement for 64-bit is minimum 90.9 MB for English-only, and 119 MB for International.

Before You Begin

If you have previously installed NVIDIA nTune, NVIDIA recommends that you uninstall nTune before installing this driver. After the driver install is complete, you can reinstall NVIDIA nTune.

Installation Instructions

- 1 Follow the instructions on the NVIDIA .com Web site driver download page to locate the appropriate driver to download, based on your hardware and operating system.
- 2 Click the driver download link.
- 3 The license agreement dialog box appears.
- 4 Click **Accept** if you accept the terms of the agreement, then either open the file or save the file to your PC and open it later.
- 5 Extract the zip files to a temporary folder on your PC.
- 6 Open the NVIDIA driver installation .EXE file to launch the NVIDIA InstallShield Wizard.
- 7 Follow the instructions in the NVIDIA InstallShield Wizard to complete the installation.

Note: After the driver installation, Windows may default to 16-bpp color and disable the Desktop Window Manager (DWM). To work around this issue, set the color to 32-bpp and then reboot the PC.

APPENDIX

MODE SUPPORT FOR WINDOWS

This chapter details the Windows modes supported by the Release 182 driver for NVIDIA products. It contains these sections:

- “General Mode Support Information” on page 26
- “Default Modes Supported by GPU” on page 27
- “TV-Out Modes Supported by TV Encoders” on page 41

General Mode Support Information

The NVIDIA graphics driver includes a standard list of display modes that are supported by default. These modes are listed in the section “[Default Modes Supported by GPU](#)” on page 27.

The actual modes available depend on the capabilities of the display. In addition, the NVIDIA graphics driver has a “dynamic EDID detection” capability and will make available *additional* modes that are listed in the display EDID, provided the graphics hardware can support it.

The NVIDIA graphics driver also supports the high resolutions available with the displays listed in [Table A.1](#) as well as the non-standard modes listed in [Table A.2](#).

Table A.1 Modes Supported for High Resolution Displays

Display	Maximum Resolution	Hardware Requirements
HP LP3065 Flat Panel Monitor (Dual-link DVI)	2560×1600 @ 60 Hz	<ul style="list-style-type: none"> All high-end NVIDIA Quadro FX graphics solutions.
Apple 30" Cinema HD Display (Dual link DVI)	2560×1600 @ 60 Hz	<ul style="list-style-type: none"> All high-end NVIDIA Quadro FX graphic solutions.
Dell WFP 3007 (Dual Link DVI)	2560×1600 @ 60 Hz	<ul style="list-style-type: none"> All High-end NVIDIA Quadro FX graphic solutions.

Table A.2 Non-standard Modes Supported

Resolution
1680 x 1050
1366 x 768

Default Modes Supported by GPU

This section lists the modes that are included by default in the driver INF for the following product families:

- “NVIDIA Quadro FX 4400/4000/1400/550/540 and NVS 440/285 Family of GPUs” on page 28
- “NVIDIA Quadro FX 4700 X2/3700/1800/580/380 and NVS 450/420/295 Family of GPUs” on page 30
- “NVIDIA Quadro FX 5600 / 4600 / 1700/570/470/370 and NVS 290 Family of GPUs” on page 33
- “NVIDIA Quadro CX and Quadro FX 5800/4800 /3800 Family of GPUs” on page 36
- “NVIDIA Quadro FX 5500/4500/3500/1500/560/350 Family of GPUs” on page 39

Understanding the Mode Format

Figure A.1 gives an example of how to read the mode information presented in this section.

	Resolution	Color Depth	Refresh Rates
Example entry:	1024 x 768	32 60 70 72 75 85 100 120 140 144 150 170 200	

Meaning:	Resolution:	1024 x 768
	Color depth:	32 bpp
	Refresh rates:	60 Hz, 70 Hz, 72 Hz, 75 Hz, 85 Hz, 100 Hz, 120 Hz, 140 Hz, 144 Hz, 150 Hz, 170 Hz, and 200 Hz

Figure A.1 Mode Format

Note:

- Horizontal spanning modes of 3840x1080 and above, and vertical spanning modes of 1920x2160 and above generally require at least 32 MB of video memory at 32 bpp.
- An “i” next to the refresh rate indicates an interlaced refresh rate.

NVIDIA Quadro FX 4400/4000/1400/550/540 and NVS 440/285 Family of GPUs

This sections lists the supported display resolutions, color depths, and refresh rates for the following products:

- NVIDIA Quadro FX 3400/4400
- NVIDIA Quadro FX 4000
- NVIDIA Quadro FX 3450/4000 SDI
- NVIDIA Quadro FX 1400
- NVIDIA Quadro NVS 440
- NVIDIA Quadro FX 550
- NVIDIA Quadro FX 540
- NVIDIA Quadro NVS 285
- NVIDIA Quadro NVS 210S

Standard Modes

640 x 480	8	60 70 72 75 85 100 120 140 144 150 170 200 240
720 x 480	8	60
720 x 576	8	50 60
800 x 600	8	60 70 72 75 85 100 120 140 144 150 170 200 240

NVIDIA Quadro FX 5500/4500/3500/1500/560/350 Family of GPUs

This sections lists the supported display resolutions, color depths, and refresh rates for the following products:

- NVIDIA Quadro FX 4500
- NVIDIA Quadro FX 350
- NVIDIA Quadro FX 5500
- NVIDIA Quadro FX 3500
- NVIDIA Quadro FX 1500
- NVIDIA Quadro FX 4500 X2
- NVIDIA Quadro FX 560

Standard Modes

TV-Out Modes Supported by TV Encoders

Table A.3 and Table A.4 list the NTSC, PAL, and HDTV TV-Out modes supported by the NVIDIA driver.

Table A.3 Mode Support for S-Video and Composite Out

Resolution	Bit depth	Comments
320x200	8, 16, 32	DirectDraw mode; not selectable as a Windows desktop
320x240	8, 16, 32	DirectDraw mode; not selectable as a Windows desktop
640x400	8, 16, 32	DirectDraw mode; not selectable as a Windows desktop
640x480	8, 16, 32	
720x480	8, 16, 32	Overscans (for video)
720x576	8, 16, 32	Overscans (for video)
800x600	8, 16, 32	
1024x768	8, 16, 32	Conexant 25871 only

Table A.4 Mode Support for Component YPrPb Out and DVI Out

Resolution	Comments
480i (SDTV)	Supported on graphics boards with Conexant 875 or Philips 7108 TV encoders and compatible connectors, and compatible GeForce 6 Series, GeForce 7 Series, and GeForce 8 Series GPUs.
480p (EDTV)	
720p (HDTV)	
1080i (HDTV)	
576i (PAL)	
576p (PAL)	

The driver supports manual overscan correction for component and DVI outputs. See the *ForceWare Graphics Driver User's Guide* for instructions on how to use the overscan correction features in the control panel.
